## SCOPE AND OBJECTIVE

COST is a framework for the European Co-operation in the field of Scientific and Technical Research, allowing the co-ordination of nationally funded research on the European level. COST aims at ensuring that Europe can hold a strong position in the field of scientific and technical research.

COST Action C25 aims to promote a scientific understanding of life-time engineering and to boost science-based advancement of sustainable construction in Europe.

The Action is focused on an integrated approach to deal with the end-products of construction, clearly targeted at the development of R&D and engineering methods from structural point of view. It aims at providing the construction sector with a new framework and ideas based on the integration of approaches and results of ongoing projects.
